Cable television has a choice! We want to choose. Cspan/CNN do not interfere with local news shows! Nat'l newspapers do not interfere with local rags. I want to pay for a wider variety of informatin without advertising. BBC does not interfere with NPR! I get both and a lot of it. NATIONAL PUBLIC RADIO gives new and weather. Is that different? There is no reason local radio has a monopoly on happenings. I think people who listen to local radio stations and local TV will stick with that. Those of us who are willing to PAY for more and a bigger variety are going to have it sooner or later. It's inevitable.... Besides, we listen to local stuff, too.... Thanks for a great country with tons of options and let's keep it that way!!
